Supporting Healthy Kidney Function!

As an aid for Malfunctioning Kidneys apply as a pack directly the kidney
Aids Kidneys in Urine Production
Floods the Kidneys with the Herbal Supports needed for clearing waste
Herbal Combination Aids in Stimulating the Kidney and rebuilding healthy function

BOTANICAL INGREDIENTS:

All Organic: Burdock Root, Parsley Root, Juniper Berry, Marshmallow Root, and Ginger Root

BURDOCK ROOT

Burdock is one of the best alternative and blood purifying agents in nature; it cleanses and eliminates impurities of the blood very rapidly. Burdock increases the flow of the urine, and relieves congestion in the lymphatics. As an alterative (an herb to cleanse the blood and tone the body), you need to use the tea over a period of time.

PARSLEY ROOT

Parsley is a remarkable diuretic which, among other things heals many complaints of the urinary system. To void urine Dr. Christopher specifically recommended combining the Parsley with Juniper berries. Parsley is a remarkable remedy for expelling watery poisons, excess mucus, reducing swollen and enlarged glands.

JUNIPER BERRY

Juniper is a prime herb for eliminating passive congestion of the kidneys resulting from heart problems and other causes. It removes waste products from the system via the kidneys; thus it is sometimes considered an agent for "internal fumigation" to ward off contagion. Not only does the herb work through the urinary tract, it also strengthens and builds the tract, the urinary passages and the bladder as well as the kidneys.

MARSHMALLOW ROOT

Marshmallow is excellent as a diuretic and kidney healer. It is a specific for many urinary tract troubles. It is said to give prompt relief in gravel, inflammation of the kidneys and bladder. It helps in retention of the urine and cystitis. The herb relaxes the urinary passages and relieves pain. Used in combination with other diuretic herbs, such as parsley root, in the form of a tea, Marshmallow root will relieve the attack of kidney stone and gravel and aid in their smooth expulsion.

GINGER ROOT

Ginger has a detoxing on the body by increasing circulation and detoxifying the liver, in addition to stimulating the immune system. It has a positive effect on the digestive system and helps reduce intestinal gas. It also has a soothing effect on any inflammation that the Candida overgrowth may cause in your intestinal tract.

SUGGESTED USE

Apply as a pack over affected Kidney Area:

Items Needed: Kidney Salve, Press n Seal Wrap, Flannel Material

Apply Salve to Folded Flannel (2 layers)

Place Flannel with salve on Plastic Wrap and apply over Kidney Area. Cover with Towel and top with Heating Pad for 45 minutes to an hour before going to bed. Leave pack on all night.

Reapply as needed to support Kidney function.
